<u>INJURY</u>

I	Supervisor ensure scene safety by stopping traffic/access in immediate area
2	Determine the nature of the injury/illness
3	 If an EMERGENCY, call VPA police at 757-440-7070. (VIP 540-636-4242 / RMT 911 then call 757-440-7070) Upon arrival of an ambulance, stop operations in that area until the ambulance departs. I. Any Airway, Breathing, or Circulation issue requires an ambulance. 2. Any electrical shock requires an ambulance. 3. Any injury in which there is uncertainty in the mind of the AOM/Manager requires an ambulance.
4	For Non-Emergency occupational injuries, Port of Virginia managers and supervisors call the Health and Safety Response Team at 757-440-6800. This is for strains, sprains, minor lacerations, and other injuries that clearly do not require an ambulance.
5	 Non-Emergency: I. If our employee DOES NOT request medical care a. Explain that the employee must contact the Health and Safety Department in the event they decide to seek medical care. b. Complete the "POV Incident Report". c. The terminal AOM will coordinate for a Drug and Alcohol test. Employees who are clearly not causal to a mishap are not required to test (i.e. A UTR parked in a marked spot is hit by a straddle carrier).
	 If our employee DOES request medical care Complete medical care authorization form (included below). Typically a member of the Health and Safety Departments will coordinate transportation for the individual to Taylor Made/Patient First. If an Uber/taxi may is used, escort the injured employee in a company vehicle to the pickup point. NIT: Baker Street Gate, VIG: Lobby, PMT/PPCY: Port Police Parking Lot, NNMT: Main Office. The Drug and Alcohol test will be accomplished at the medical facility.
	3. Complete the "POV Incident Report". Sign, Scan, and Send Report to safetyandrisk@VIT.org .
6	All companies on Port of Virginia terminals must report any incident to the respective VIT department staff (I.e. vessel, gate, rail, etc). VIT Assistant Managers (AOMs) are required to investigate and complete a Port of Virginia incident report for any company working in their area of responsibility such as MRS, CERES, TTX, JAZ, and CP&O etc.

RESCUE CAGE OPERATIONS

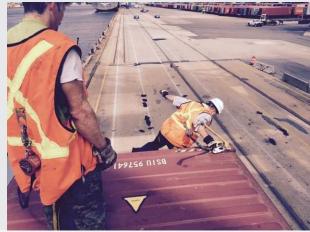

- I. The Rescue Cage may only be used for rescue operations. Specials exemptions may be granted by the VP of Health and Safety or Directors of Vessel Operations/Stevedoring.
- 2. The Stevedore Superintendent/AOM will direct the retrieval of the rescue cage.
- 3. The Stevedore Superintendent/AOM will ensure the 4 safety chains are connected to the STS spreader bar. Crane maintenance may assist in this process.
- 4. The Stevedore Superintendent/AOM will coordinate with EMS personnel, if applicable, for the plan to extract the injured employee from the vessel.

NIT and VIG Rescue Cage

Lasher Fall Rescue Procedure

I. Call 440-7070

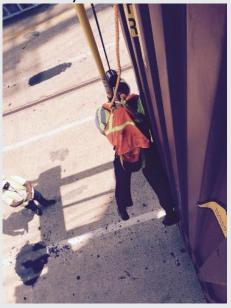

2. Retrieve Rescue Pole with rope and pre-attached hardware from Orange container on Crane.

3. Be properly locked in with aloft gear to perform rescue and Connect Large Hook to corner of Crane Spreader Bar.

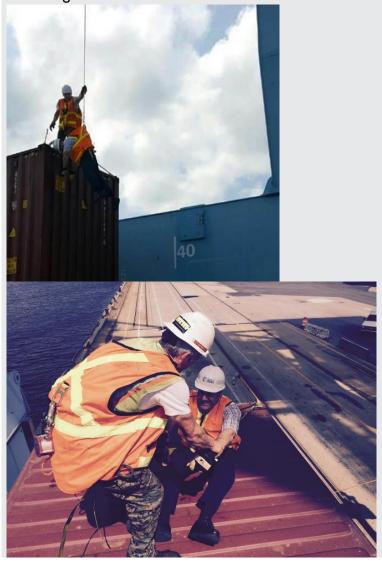

4. Kneel or lay, extend Rescue Pole, Connect Carabiner into D-Ring located on the back of victim's harness and pull the Rescue Pole free. Double check to insure carabiner is securely attached to the victim D-Ring.

5. Signal crane operator via radio to gently lift victim and place individual on the container top. Release the rescue line and the Container Top Wand connected to the victim when safe to do so. Ensure that victim is maintained in the sitting position to guard against potentially fatal effects of Suspension Trauma. It is REQUIRED that victim stay in a sitting position for AT LEAST 30 minutes. Ensure victim safety harness leg straps are loose enough to allow blood circulation. Conduct turn-over to first responders.

Equipment/Property/Cargo Damage

I	Supervisor ensure scene safety by stopping traffic/access in immediate area
2	Call VPA police at 757-440-7070
3	 Have individual meet with Supervisor a. Complete Drug and Alcohol test form. b. Call for a blood and alcohol nurse at 424-4300 to come to the terminal for drug and alcohol testing. There is no need to sit with the employee while waiting. Employees who are clearly not causal to a mishap are not required to test (i.e. The trailer train of a UTR parked in a marked spot is hit by a straddle carrier). If an individual is positive for the instant results alcohol test, inform the Supervisor/Business Agent and ensure they take a taxi to get home. c. Investigate the mishap or near miss in accordance with #8 below and complete the "Incident and Near Miss Report." d. All companies working in an area of the terminal controlled by a VIT operational manager must also report incident to the respective department staff (I.e. vessel, gate, rail, etc). VIT Assistant Managers (AOMs) are required to complete a Port of Virginia incident report for any company working in their area of responsibility such as MRS, CERES, TTX, JAZ, and CP&O etc.
4	Environmental Impact: In the event of any incident which occurs on a Port of Virginia facility; attention shall be given to sources that may impact the environment including but not limited to storm water, waste disposal, hazardous materials/waste, and universal waste. An investigation of the incident should be conducted to ensure that potential paths for contamination are addressed and waste properly removed and disposed of in accordance with federal, state, and local regulations. Records of this investigation should be recorded and retained should it be found that an impact to the environment has occurred. Should there be questions encountered during an incident response, the Sustainability Department may be contacted.
6	Sign, Scan, and Send the "Port of Virginia Incident Report" with photos to safetyandrisk@VIT.org and manager by close of business. For pre-existing damage to a discharged container, the container number, vessel name, date, and description of damage are required. Also, additional details if appropriate to include use of wires or if container was placed under cover, etc. Administrative Follow-up a. Do not accept liability for any incident, regardless of cause. Direct all claim inquiries from VIT's customers to riskmanagement@vit.org .

Employee Signature Date		

Reasonable Suspicion Drug and Alcohol Test

I	Call the HSE Department Rotation at 757-440-6800
2	Have individual meet with Supervisor
	 a. Call for a blood and alcohol nurse at 424-4300 to come to the terminal for drug and alcohol testing. In this case, it is appropriate to remain with the employee. b. Clearly inform employee that a Drug and Alcohol test will be administered and that they must remain in the immediate area of the office. (Restroom and Smoke breaks are acceptable).
	c. Complete the Drug and Alcohol test form.

Blood or Other Potentially Infectious Materials (OPIM) Spill

I	Employee a. Immediately notify Supervisor
2	Supervisor a. Ensure scene safety by stopping access in immediate area b. Contact the H&S Department at 757-440-6800
3	H&S Representative a. Contact PetroChem at 757-627-8791

6 ■ Alternates Hazmat Clean-up companies	6	■ Alternates Hazmat Clean-up companies
 LCM Corp (Steve Cerroni) 757-831-3866 Scott Wood (757-810-5021) Hepaco/IMS: 757-543-5718 		

	Clean Harbors Chesapeake: 800-645-8265
	Heritage Crystal Clean, Inc.: 757- 852-9142
	Moran Environmental Recovery 757-216-8836
7	■ If container/tank is actively drippingplace on a spill cassette/spill pad.
,	 Before bringing a container to the dock from the vessel, ensure product will not enter the water. If container is actively leaking, H&E must notify USCG before container is moved from vessel to dock.
8	Spill Containment Assets
	■ NIT Spill Pad
	 Two pads north of Straddle Carrier Rack (Wheeled Area 240)
	 One pad on west end of reefer rows next to Crane Maintenance
	■ VIG Spill Containment Cassette
	Two at VIG
	■ PMT Spill Pad
	Next to the Clyde Crane
9	■ If using a Spill Pad at NIT
	 Review travel path to ensure not crossing over a drain.
	 Consider Restricting Employees from the movement area.
	 Ensure no standing water is in the spill pad before parking a hazmat container, if
	the substance is reactive with water.
	 Close valve on the spill pad before placing a hazmat container on the pad. The
	valve is closed when perpendicular to outfall pipe.
	 Update the location of the container in VIT system
	■ If using a Spill Cassette at VIG
	 Consider Restricting Employees from the area.
	 Ensure no standing water in spill cassette before placing a hazmat container, if the
	substance is reactive with water.
	 Pre-position Spill Cassette and close valve before placing a hazmat container on
	Cassette. Valve is closed when perpendicular to outfall.
	 Load Container onto Cassette and park on North End of Dock
10	When the contents of a tank container must be transloaded, arrange to have the
	procedure accomplished at an off-site facility, if possible.
	When the transload must be accomplished on POV property, use this procedure.
	 Place the replacement tank on the ground
	 Place an empty container on the ground with blocks of wood elevating one end
	just enough to provide a very shallow slope.
	 Place the source tank on top of the empty container for the transload.

PETROLEUM SPILL

(Oil, Hydraulic fluid, Diesel, Gasoline, etc)

- Supervisor assess the situation
 - Remove ignition sources and ensure no smoking
 - Shut down equipment
 - Block any affected drains
- Call VPA police at 440-7070 (VIP 540-636-4242) (RMT-804-271-4162)
- The estimate of the amount by Crane or Vehicle maintenance is important. Greater than 25 gallons or ANY amount in the drains is the threshold for reporting to National Response Center.
- For spills on the pavement
 - o Crane Maintenance will deploy spill truck and conduct clean up.
 - o If applying spill absorbents onto vehicle scales, ensure any gaps are covered to prevent oil-dri from entering underneath the scales.
 - NIT Crane Maintenance......440-7053
 - PMT Crane Maintenance.....272-8242
 - VIG Crane Maintenance.................686-6155
 - NNMT Facility Maintenance......928-1224
- For a Genset leak/spill
 - Write down the Genset number and call vendor to assist shutdown genset.
 - Contact container Shipline to retain clean up company vendor (Primary: Petrochem)
 - MRS at VIG: Rob Diaz (751-2984)/Leo Castillianos (214-7934)/Steven "Kip" Wall 406-0483/Justin Prinz 735-5735
 - VIT at VIG: Pat Baker (757-449-1155)
 - MRS at NIT: Rob Diaz (751-2984 or rdiaz@mrs-cmc.com)/Dan Brown (449-6608)/John Brown (395-0929)/Ricky Hoffman (328-5703)
 - o MRS at PMT: Leo Castillianos (435-9342)/George Cooper (434-0794)
 - JAZ at NIT: Pat Foley (477-0207)/Tim Zimmerly (449-5192)
 - IT Conglobal at NIT/PMT/VIG (services ZIM): Joe Diaz 757-418-7411 / joediaz@cgini.com
 - o Express at NIT or PMT: Dana Baughman (434-2579)
- If ANY amount of product goes into drains (past side walls)
 - o Request crane maintenance remove down-stream grates with magnet.
 - Request crane maintenance to remove product
- If ANY amount of product goes into drop inlets inside the trench drain
 - o HSE Staff will use Drain Maps to identify downstream path
 - HSE Staff will contact Petrochem for assistance
- If product reaches Oil Water Separator or containment vault
 - o Remove drain covers and HSE Staff will have Petro-chem remove the product.

- If product reaches South retention pond at VIG or Reservoir under dock at NIT
 - VIG: Turn off Retention pond sprinkler pump and place Spill Socks at the concrete Weir in south retention pond.
 - NIT: Remove access panels via STS with slings and HSE Staff will have Petro-chem remove the product.
- If product reaches the river
 - Assess with Petrochem and have them spray microblaze.
 - o If required, HSE Staff will have petrochem deploy boats and booms
- H&S will call for a spill response company if necessary.
 - For surface Spills use Commercial Power Sweeping: 757-238-2575
 - If drains involved use Petrochem: 757-627-8791/800-723-6951/David Berglund 449-1739
 - Accurate Marine Environmental: 757-393-5840 or 757-393-5849 / Meghan Kies, 757-434-0045, Aaron Quick 757-342-1467

 - Alternate is First Call Environmentals: 1-800-646-1290
- Simplex Grinnel Fire Extinguishers/Fire System Inspection
 - o Rhonda Smith 757-544-0519

SAFETY AT WATER'S EDGE

VIG/NIT/PMT	Capability:
Terminals	■ Life ring on all STS cranes waterside leg w/90' tag line.
	Fixed ladders every 400' on the dock that reach the water at
	low tide.
	■ Rope ladders on cranes at NIT and PMT
Container Ship at	Capability:
berth	■ Life rings, Life boat, Jacobs ladder.
	■ Consider small boats, tugs or pilot
Observer	Yell, "Man Overboard". Point at the person so as to NOT lose
	sight. Have someone DIAL 440-7070 and tell them "Man
	Overboard" and give your location.
Supervisor	For night operations use crane lights or equipment lights.
Observer	Conscious : Throw a life ring to the person and have them
	swim/pull them to a fixed ladder.
Supervisor	Unconscious or serious injury: Supervisor consider sending
	swimmer into water to keep the person afloat. Rescuer wear life
	vest from STS crane leg with tag line.
	Water Temp Range is 45F to 86F. For 45F (Jan and Feb) time of
	use for fine motor muscles is 5 minutes.

CONTAINER IN THE WATER

- Typically, containers will temporarily float
- POV Supervisor obtain control of the container
 - Determine if container comes to dock with current
 - ➤ If not, call Bill Burket Office: 757-683-2199 / Mobile: 757-615-6661 or Tracy Freeman Mobile: 757-646-8444
 - ➤ Richmond Marine Terminal Norfolk Tug: Alex Merz 757-621-2840
- Call VPA police at 440-7070 (VIP 540-636-4242)
- Once container is controlled and next to the dock
 - O Don a life jacket if on or over Bull-Rail
 - Place a wire rope through a twist lock and lash to bollard
 - Tie a life ring with rope to container to mark location if container sinks.
 - Coordinate for immediate high priority lift out of water to dock
 - Station Crane Maintenance in Crane Cab to ensure lift does not exceed maximum limit
- If Container Sinks
 - Request Divers to locate container
 - Crofton Diving (Roger Belch) 757-418-2935 or (Matt Tayson)
 757-409-6908
 - Once container located Request Crofton Barge Crane

ACTIVE THREAT EMERGENCY RESPONSE

- Current locations: WTC, FSC, Acosta, VIG TOB, and POC
- If an active threat is witnessed inside the work area and it is safe to do so, proceed to a wall-mounted alarm panel and activate the push button.
- There will be a visible blue light that flashes from the ceiling beacon. There will be NO audible alarm.
- This will notify the Police Command Center of an "active threat"
- Or call VPA Port Police at (757)440-7070 to report an incident.
- Be aware of your surrounding during the situation, and respond accordingly.
 - AVOID starts with your state of mind.
 - Pay attention to your surroundings.
 - Have an exit plan.
 - Move away from the source of the threat as quickly as possible.
 - The more distance and barriers between you and the threat, the better.
 - DENY when getting away is difficult
 - Keep distance between you and the source.
 - Create barriers to prevent or slow down a threat from getting to you.
 - Turn the lights off.
 - Remain out of sight and quiet by hiding behind large objects and silence your phone.
 - o DEFEND because you have the right to protect yourself.
 - If you cannot Avoid or Deny, be prepared to defend yourself.
 - Be aggressive and committed to your actions.
 - Do not fight fairly. THIS IS ABOUT SURVIVAL.
- Clearly identify yourself to responding personnel with nothing in your hands and your arms raised.

Adverse Weather

Winds Forecast >35 MPH (Steady State or Gust)

VIG Preparation

- Ops check weather stations at VIG. http://vigwindsat50feet.vitnet.vit.org/vws/wx.htm
- Execute program to flatten stacks with attention to Stack 15/16 and Stack 2/3 with a maximum of 3-high empties.
- o Identify and eliminate all chimney stacks.
- o Secure empty stacks, as required.
- If forecast >50 mph Secure STS Crane Storm Pins.
- If forecast severe thunderstorms or winds > 75 mph = Secure STS Turnbuckles
- o TOB/MB/DA rated to 110 mph

VIG Operations Limits

- Cease |LG Operations at >25 mph.
- Cease Kalmar Side Loader Stacking Over 2-High > 25 mph.
- Cease Top Loader Stacking Over 2-High > 30 mph.
- Cease Reach Stacker Stacking Over 2-High >30 mph.
- Cease Hyster Side Loader Stacking Over 2-High > 45 mph.
- Cease Rubber Tire Gantry Operations at >45 mph.
- Cease LSTZ RMG delivery to trucks at >50 mph.
- Cease CRMG operations >50 mph
- Cease Shuttle Truck operations at >50 mph.
- Cease Ship-to-Shore Cranes operations at >50 mph OR if the operator cannot safely land a container. The Crane Maintenance supervisor will decide when it is safe to move the crane to a mooring. The gantry brakes will remain set (closed) until it is safe to resume cargo operations.
- If wind gusts exceed the above limits, according to the wind alert text system, the General Operations manager or designated representative, is responsible to ensure that operations cease.
- The maintenance manager or senior maintenance representative also has the authority to remove equipment from service based upon the assessment of risk.
- When the order is given to cease operations, equipment operators will remain in the machine and away from any stacked containers until 10 minutes pass without a gust above the limits. If winds persist in being out of limits or are forecast to remain out of limits, direct operators to come inside.

VIG General Ops and Maintenance Managers

NIT Preparation

- Ops check weather stations at NIT: http://nitwindsat50feet.vitnet.vit.org/vws/wx.htm
- o Flatten empty stacks to 2-high OR block stow w/ straps.
- o Identify and eliminate all chimney stacks.
- Secure empty stacks, as required.
- o Remove any potential flying debris. Secure warehouse doors.
- If forecast >50 mph Secure STS Crane Storm Pins. If forecast >50 mph Secure RTGs with wheels perpendicular. Lock into loaded container under RTG.
- If forecast Severe Thunderstorms or winds > 75 mph = Secure STS Crane Turnbuckles
- Baker Street office building 110 mph//Crane Maintenance 100 mph // Police Bldg 100 mph //NIT Ops Tower 90 mph

NIT Operations Limits

- Cease JLG Operations at >25 mph.
- Cease Kalmar Side Loader Stacking Over 2-High > 25 mph.
- Cease Top Loader Stacking Over 2-High > 30 mph.
- Cease Hyster Side Loader Stacking Over 2-High > 45 mph.
- Cease Rubber Tire Gantry Operations at >45 mph.
- Cease RMG Operations > 50 mph
- Cease Straddle Carrier operations at >50 mph.
- Cease Ship-to-Shore Cranes operations at >50 mph OR if the operator cannot safely land a container. The Crane Maintenance supervisor will decide when it is safe to move the crane to a mooring. The gantry brakes will remain set (closed) until it is safe to resume cargo operations.
- If wind gusts exceed the above limits, according to the wind alert text system, the General Operations manager or designated representative, is responsible to ensure that operations cease.
- The maintenance manager or senior maintenance representative also has the authority to remove equipment from service based upon the assessment of risk.
- When the order is given to cease operations, equipment operators will remain in the machine and away from any stacked containers until 10 minutes pass without a gust above the limits. If winds persist in being out of limits or are forecast to remain out of limits, direct operators to come inside.

NIT General Ops and Maintenance Managers

	PPCY Preparation
	 If the PMT wind sensor is not working, use the VIG wind alerts.
	 Ops check weather station at PPCY:
	http://ppcywindsat50feet.vitnet.vit.org/vws/wx.htm
	http://pmtwindsat50feet.vitnet.vit.org/vws/wx.htm
PPCY	http://nnmtwindsat50feet.vitnet.vit.org/vws/wx.htm
Terminal	Identify and eliminate all chimney stacks.
	 Secure empty stacks, as required.
Manager	Remove any potential flying debris.
	PPCY Operating Limits
	 Cease Kalmar Side Loader Stacking Over 2-High > 25 mph.
	 Cease Top Loader Stacking Over 2-High > 30 mph.
	 Cease Hyster Side Loader Stacking 5-High > 45 mph.
	RMT Preparation
	 Ops check status of weather station: http://weather-rmt.vit.org/vws/
	Identify and eliminate all chimney stacks.
	Secure empty stacks, as required.
RMT	
Terminal	RMT Operating Limits
	 Cease Top Loader Stacking Over 2-High > 30 mph.
Manager	 Vessel Operations provisionally cease at 35 mph. Land all loads and apply
	drum/swing/travel brakes. Lower boom onto blocking at ground level and
	restrain.
	 Manitowoc Crane operating limit is 35 mph.
	Liebherr Crane operating limit is 44 mph.

Lightning		
RESP	TASK	
General Operations Manager	When a severe thunderstorm is forecast, the General Operations Manager or designated representative will monitor the approach of storm to determine the presence of cloud-to- ground lightning.	
General Operations Manager	When active lightning is within 5 miles of the terminal AND moving toward the terminal, employees on foot shall be instructed to seek shelter inside.	

Tornado		
RESP	TASK	
General Ops Manager	Tornado Watch (Not actual sighting) ■ When a Tornado watch is issued for the area in which the terminal operates (Portsmouth/Norfolk/Newport News), all ship to shore cranes not in use will be secured with the drop pins.	
General Ops Manager	 ■ When a Tornado warning is issued for the area in which the terminal operates (Portsmouth/Norfolk/Newport News/City of Richmond/Henrico County/Chesterfield County), all operations will cease and employees will be directed by radio to shelter inside at an internal location away from windows. ■ If a Tornado is spotted within the vicinity of the Terminal, all operations will cease and employees will be directed to shelter inside a permanent structure. 	

Adverse Weather Response – Heat		
RESP	TASK	
	Managers and Supervisors: Follow procedures in the OSHA Heat Index App on duty phones.	
Terminal Director OR Terminal Manager	 Alert employees to the heat index and the importance of keeping an eye on each other and using the buddy system. Provide rest breaks for those engaged in strenuous work and who are not in an air-conditioned work environment. (Especially FM, CM, Cargo, Ship Gangs, and Lashing Gangs) Utilize shaded area Provide adequate amounts of drinking water Drinking water temperature should be 50°F to 60°F, if possible. Encourage employees not to consume drinks containing caffeine and high sugar content; these drinks may lead to dehydration Remember once an employee feels thirsty, they are already dehydrated Encourage use of sun screen Monitor employees' responses to heat Schedule strenuous jobs to cooler times of the day 	

Fog

TASK

- When fog is forecast, drive facility to ensure minimum visibility markers are met.
- Consider Mass e-mail and web-site posting if terminal operations are suspended.
- VIG Gate
 - o To open OCR Portals, must see from DA to the OCR Portals.
- VIG LSTZ
 - To Open Yard, must see from TOB offices to light pole half way down 405
 Reefer row. Seeing the lights is not sufficient...the light pole must be seen.
- VIG Rail
 - To Open Rail Yard, must see from RBA Portal to Yellow Rail swing Gate.
- VIG Dock
 - To operate, must be able to see from bull rail to yellow sign marking stack number and Crane Operator must be able to see containers from the cab.
- NIT Gate
 - To open Interchange, must see between major light poles in stacks.
 - o If insufficient visibility, manager ensure employees remain at break area.
- NIT NTZ and North Dock
 - To Open North NIT Dock and Yard, must see between major light poles in the stacks. and Crane Operator must be able to see containers from the cab.
- NIT STZ and South Dock
 - To Open South NIT Dock and Yard, must see between major light poles in the stacks.
- NIT Rail
 - o To Open CRY, must see between major light poles in stack.
- NNMT Gate and Yard
 - To Open, must see from Terminal Manager's door to NE corner of Interchange roof.
- NNMT Dock
 - o To open, must see from entry to pier at cement lip to 2nd garage door.
 - Ensure terminal lights are turned on.
- PPCY Yard
 - To open, must see from the POC entrance brick utility building to the corner of the POC building.

- 7. In the case that this event affects employees beyond those accomplishing the work, develop a slide to visually communicate the event to the affected employees.
 - a. Slide Required Examples: Trench Drain Repair, Moving UTR parking area, Rail pavement repairs
 - b. Slide Not Required Examples: Recovering containers in RMG stacks, Derailment, Demo light pole
- 8. Coordinate with H&S and then communicate this slide to affected employees.
 - a. C. Mize NIT, FSC, VIP
 - b. A. Booth PMT, PPCY, PCY, POC, Lee Ave, NNMT
 - c. C. Green VIG, RMT, WT
- 9. I have completed the steps above and understand my responsibility to ensure that this Non-Standard event is accomplished according to the plan.

GENERAL PRECAUTIONS

- □ All persons using hot work equipment are qualified in its use and safety procedures.
- □ All hot-work equipment is in good condition.
- □ All persons using hot work equipment must wear eye and hand protection.
- □ All persons in the area must be shielded from the light and vapors generated by hot work.
- □ Flooring in the area shall be swept clean and wood planking shall be sprayed with water.
- □ Combustible material shall be removed 35 feet horizontally from the hot-work area or protected with flame proof covers or shielded with fire resistant guards/curtains.
- □ Welding and burning operations shall not be conducted in the vicinity of cargo handling operations unless such hot work is part of the cargo operation.
- Hot work may not be conducted within 100 feet of bulk cargo operations involving flammable or combustible materials, within 100 feet of fueling operations or explosives, within 50 feet of Hazardous materials, or during gas freeing operations.
- $\ \square$ A fire extinguisher must be present in the work area with a current annual inspection.

WORK ON ENCLOSED EQUIPMENT

- □ Flammable vapors/liquids/solids must be completely removed from container/pipe/transfer lines.
- □ Tanks used for storage of flammable or combustibles must be tested and certified gas-free.
- □ In confined spaces, ventilating equipment shall be used to exhaust hot-work fumes.

FIRE WATCH

- □ Except in areas designed for hot work, there must be at least one qualified person assigned to fire watch with no other duties and who is trained with fire extinguishers and sounding the alarm.
- $\ \square$ If hot work is planned for the boundary of a compartment (*i.e.* bulkhead, wall, or deck), an additional fire watch must be stationed in the adjoining compartment.
- □ Fire watch must remain for at least 30 minutes after completing hot work operations.
- □ If a fire occurs, shut down hot work equipment and call the emergency number: 757-440-7070

I have personally examined the above area and certify that the listed precautions have been taken. Furthermore, I will ensure compliance with all requirements in this permit and accept responsibility for ensuring compliance with 33 CFR 126.30, NFPA 51B, 29 CFR 1917.152, 46 CFR 35.01-1, 46 CFR 91.50-1, as well as local laws and ordinances.

SUPERVISOR PRE-ENTRY ACTIONS

- o Inform all personnel that no one is to enter the confined space unless the attendant is present at the work site.
- Place warning signs or barriers around the confined space to prevent unauthorized entry.
- o Inform personnel of the contents of the confined space and the access procedure.
- o Ensure personnel are equipped and trained to use the required PPE.
- o Inform all entrants that they are required to maintain communication with the attendant.
- Inform attendant that they must maintain constant contact with all entrants and have no other duty while personnel are inside the confined space.
- Inform personnel of the type of communication they are to use.
- Inform the attendant that they may not enter the confined space under any circumstances.
- Review the method to isolate all mechanical, liquid, and/or electrical hazards as necessary.
- Inform personnel of atmospheric levels that must be maintained before and during entry.
- o Inform personnel of the maximum permissible exposure level (PEL) and monitoring method.
- Inform personnel of the symptoms and health effects of exposure to toxic fumes.
- Purge/ventilate the confined space as necessary.
- Test the atmosphere for oxygen content. If oxygen <19.5% or >23.5%, perform additional ventilation and retest.
- Test for flammable gases. If >10% of lower explosive limit (LEL), continue ventilation.
- o No entry may be performed at the Port of Virginia with a toxic atmosphere present.
- Ensure the attendant is trained in and aware of the rescue procedures to be followed.

ATTENDANT RESPONSIBILITIES

- o Know the potential hazards, including signs/symptoms and consequences of exposure.
- Know the possible behavioral effects of hazard exposure in authorized entrants.
- Continuously maintain an accurate count of authorized entrants in the permit space.
- o Remain outside the space during entry operations until relieved by another attendant.
- Monitor activities inside and outside the space and order immediate confined space evacuation under the following conditions:
 - If attendant detects a prohibited condition.
 - If attendant detects the behavioral effects of hazard exposure.
 - If attendant detects a situation outside the space that could endanger the entrants.
 - If attendant cannot effectively and safely perform all the duties required.
- o Call rescue services immediately if the entrants need assistance to exit.
- Warn unauthorized persons that they must stay away from the permit space and inform the entry Supervisor if unauthorized persons have entered the permit space.
- Perform no duties that might interfere with primary duty to monitor authorized entrants.
- In the event of an emergency, immediately report it to the VPA Police at 757-440-7070, expecting a 911 response.
 - Attempt to remove the victim by use of the retrieval line from outside the confined space and render first aid if trained until rescue services arrive.
 - If the attendant is unable to remove the victim by using the retrieval line, he or she must wait for help to arrive. The attendant(s) is not to enter the confined space for any reason.

Toxic #3	PEL/STEL	1	1	1	1	1	1
Air Tester I	Name:	Туре:		Model:		Serial #:	

ENTRANT RESPONSIBILITIES

- Know the potential hazards, including signs/symptoms and consequences of exposure.
- Ensure proper use of equipment to include:
 - Atmospheric testing and monitoring equipment.
 - Ventilating equipment needed to obtain acceptable entry conditions.
 - Communication equipment necessary to maintain contact with the attendant.

- Personal protective equipment, Lighting equipment, and ladders, as needed.
- Rescue and emergency equipment, as needed.
- o Maintain constant communication with the attendant.
- Alert the attendant upon recognizing a prohibited condition or warning signs/symptoms of exposure to a hazardous atmosphere.
- Exit the permit space promptly whenever an order to evacuate has been given by the attendant or the entry supervisor, the entrant recognizes a warning sign/symptom of exposure to a dangerous situation, or the entrant detects a prohibited condition.

RESCUE PROCEDURES

- o Immediately request a fire department rescue from the VPA Police at 757-440-7070.
- Attempt to remove victim by use of retrieval line from outside the confined space.
- If unable to remove the victim by using the retrieval line, wait for help to arrive. Do not enter the confined space.

I have personally examined the confined space area and certify that the listed precautions have been taken. Furthermore, I understand and will ensure compliance with all requirements in this permit and accept responsibility for ensuring compliance with 29 CFR 1910, ANSI Standard Z117.1 – 2009 (Safety Requirements for Confined Spaces), as well as local laws and ordinances.
